PLM Maturity Manual

A comprehensive manual that explains the intricacies of PLM Maturity and how to assess it, in a way that presents clear and useable findings.

This is a hands-on instruction manual for evaluating PLM Maturity and using it to generate accurate roadmaps.

Version 3.0E

Foreword

The concept of PLM Maturity has been around for more than a decade, and has formed into a general idea that if you choose 5 Levels of maturity progression, and write down how you perform against them, you will find a 'Maturity Score' for your company.

In fact this does not work. The subject of 'Maturity' in general breaks down into much more detail than this; and when it is applied to PLM it becomes even more complex. You must decide whether to measure absolute or relative maturity; choose levels that match the way that PLM develops; and break down each score into subdivisions that apply to the way that PLM is enacted.

The only way to treat the subject is thoroughly, and that is what this Manual sets out to do.

Accurate measurement of PLM Maturity is important for three reasons:-

1. Many companies have been working on PLM for more than a decade, with no clear indication of progress. The ability to quantify PLM Maturity will enable them to demonstrate their progress in graphical and numerical terms, and hence will show how much more of the journey is still to be travelled.
2. The industry as a whole has no central idea of what “completed PLM” entails, apart from the fact that it will be digitally connected. The concept of **Full PLM Maturity** (as defined in this Manual) provides this vision in a way that is straightforward and easy to understand.
3. The most effective method for long-term roadmapping is to understand the strengths and weaknesses of the current maturity situation and to plan towards Full Maturity.

The first step towards understanding PLM Maturity is to evaluate your own, as it is now, and the *PLM Maturity Manual* enables you to do this.

0 Executive Summary

This *PLM Maturity Manual* enables PLM practitioners to understand and measure the maturity of any PLM implementation.

PLM does not lend itself to Maturity assessment by generic methods. Conventional, widely-used scales of maturity level from 1-5 do not apply properly to PLM; and conventional metrics fail to provide adequate granularity in terms of the analysis. For a PLM environment, most methodologies are insufficiently precise about the scope and perimeter of interest, and fail even to define the type of maturity that is being measured.

This *Manual* contains a comprehensive Maturity assessment methodology that is designed specifically for PLM, together with wider explanations of the subject material and how to use it for analysis and roadmapping.

The Manual begins by explaining the main issues of PLM Maturity to establish the context; and describes two alternative scales, or metric criteria, against which Maturity can be scored.

The original *PLM Maturity Manual* set out two possible methods of carrying out the assessment:- Activity-Based, or Structure-Based. This Version focuses on the Activity-Based method, which leads seamlessly into roadmapping and planning; and provides more detailed text to guide the user through the process. The Structure-Based method, (plus some other frameworks that have been proposed in the past) are covered in appendices for those who would like to use them.

Every organisation will apply the Maturity Assessment in its own context, recording its own scores, and generating its own Roadmap and follow-on projects from the results.

It is important to understand and adhere to this, because:-

- (a) there are no general external standards of PLM Maturity that you could compare yourself to; and,
- (b) the main benefit of understanding your PLM Maturity is to be able to put in place a set of follow-on improvement actions, and these will be specific to your own implementation.

This *PLM Maturity Manual* contains a self-contained set of instructions that any PLM Team can apply to define their current situation and create Roadmaps for future project approval.

Table of Contents

Foreword.....	4
0 Executive Summary.....	5
About This Toolkit	10
1 Introduction	11
1.1 Background.....	11
1.2 Use Cases	12
1.3 Manual Premise	12
1.4 Structure of the Manual	13
1.5 PLMIG Q&A	13
1.6 Printing the Manual	13
2 Definitions	14
2.1 Product Lifecycle Management (PLM)	14
2.1.1 Descriptive Definition	14
2.1.2 Functional Definition.....	14
2.2 Perimeter of Interest.....	15
2.3 PLM Permeation.....	15
2.4 PLM Traction.....	15
3 How to Use this Manual.....	16
Part 1: Maturity Fundamentals	18
4 What is PLM Maturity?.....	19
4.1 Overview.....	19
4.2 Maturity, not Capability	19
4.3 Possible Maturity Parameters	20
4.3.1 Full PLM	20
4.3.2 Evolving Scale	20
4.3.3 Industry Factors	20
4.3.4 Organisation Factors.....	20
4.3.5 Product Development Position	20
4.3.6 Lifecycle Position	21
4.4 Full PLM Maturity - Definition.....	21
5 PLM Maturity Levels	22
5.1 Overview.....	22
5.2 “Standard” Scale	23
5.3 PLM Scale.....	24
5.3.1 Scale Boundaries.....	24
5.3.2 Low-End Maturity Levels	25
5.3.3 Working Maturity Levels.....	26
5.3.4 Future Maturity Levels.....	27
5.4 Scale Subdivisions	28
6 Maturity Permeation.....	29
6.1 Maturity Development.....	29
6.2 Lights Out / Lights On.....	29

Part 2: Maturity Methodology	30
7 Maturity Assessment Methodologies.....	31
7.1 Overview.....	31
7.2 Activity-Based Method.....	31
7.3 Structure-Based Method.....	32
7.4 Choosing the Method	32
8 Maturity Methodology: Activity-Based	33
8.1 Overview.....	33
8.2 Basic Principles.....	33
8.3 Aim	34
8.4 Iteration.....	34
8.5 What You Need to Know	34
8.6 Positioning	35
8.7 Setting the Parameters.....	36
8.7.1 Choosing the Perimeter of Interest	36
8.7.1.1 CAE Example.....	36
8.7.1.2 Supply Chain Example	37
8.7.2 Choosing the Metric Axes	37
8.8 Compiling the Maturity Score.....	39
8.8.1 Position.....	39
8.8.2 Focal Points.....	39
8.8.3 Perimeter of Interest.....	39
8.8.4 Maturity Levels.....	40
8.8.5 Axes	40
8.8.6 Assessment	40
8.8.7 Scoring	40
8.9 Review / Action	41
8.9.1 Documentation.....	41
8.9.2 Presentation.....	41
8.9.3 Next Steps	41
Part 3: Presentation of Results	42
9 Presentation of Results.....	43
9.1 Core Documentation.....	43
9.2 Maturity Assessment Report.....	44
9.2.1 Document Structure	44
9.2.2 Level of Detail	45
9.2.3 Presentation of Results	45
9.2.4 Discussion of Results.....	46
Part 4: Roadmapping	48
10 Roadmapping Methodology.....	49
10.1 Quick Wins.....	49
10.2 Roadmapping Overview	49
10.3 Fundamentals	50
10.4 Common Questions.....	51
10.5 Principle.....	52
10.6 PLM Roadmap Document	53
10.7 Maintaining the Roadmap.....	54

Class A PLM	56
11 Integration with Class A PLM	57
Appendix 1: Structure-Based Maturity Methodology	58
12 Maturity Model: Structure-Based	59
12.1 Overview	59
12.2 Structure-Based Matrix	60
12.2.1 Basic Matrix	60
12.2.2 Extending the Matrix [1].....	61
12.2.3 Extending the Matrix [2].....	62
12.2.4 Displaying the Initial Results.....	63
12.2.5 Spreadsheet Structure	64
12.2.6 Analysing the Detailed Results.....	64
12.2.7 Analysis by Function	65
12.2.8 Analysis by PLM Element.....	66
12.3 Compiling the Maturity Score.....	66
12.4 Detailing the Maturity Score.....	67
12.5 CAE Example.....	68
Appendix 2: Other Roadmapping Techniques	70
13 Three Alternative Options	71
13.1 Option 1	71
13.2 Option 2	72
13.3 Option 3	73
Terms and Conditions	74
14 Terms and Conditions.....	75
14.1 PLM Maturity Manual Ownership and Use	75
14.2 Disclaimer	75
